NEWS FROM THE FRONT

3 May 2020

Dear fellow Warriors,

Please read the below commentary that Veterans in Defense of Liberty® published today.

Please amplify as you desire - it contains vital knowledge that needs to be disseminated as far and wide as possible; we must incentivize as many Americans as possible - to stand up and take action - NOW.

"Americans cannot live their dream, they cannot live the American dream when they are walking in fear." - Dr. Wm. Scott Magill

The Dark Side Obi Wan Fauci

These are not the Drugs you're looking for - move along

It is time to seriously question everything we are told regarding the physical and the cultural virus.

Dr. Obi Wan Fauci (Anthony Fauci) Paid 3.7 Million to the Wuhan Lab for Coronavirus development after the U.S. declared a moratorium on it. Fauci is joined at the hip with Bill Gates, paid for the [scam VA study](#) at the University of Virginia,

and has been on the payroll of the Clinton Foundation for years.

Now he gleefully flaunts the success [Remdesivir](#), which was initially developed in 2016 to fight against Ebola and made by Gilead Biosciences as the "cure" for COVID19. Bear in mind that Dr. Fauci reportedly has close ties , through the Clinton Foundation, to the [director-general of the World Health Organization](#) (WHO), Tedros Adhanom Ghebreyesus, who appears to promote whatever [Xi Jinping](#) wants him to promote. And who holds the patent on Remdesivir? – China.

And just who, or what is [Gilead Biosciences](#)? Gilead is partnered with Wuxi Pharmaceuticals, an international pharmaceutical, [biopharmaceutical](#), and medical device company. According to Wikipedia, "The company covers the development cycle through five core operations, including small molecule R&D and manufacturing, biologics R&D and manufacturing, cell therapy and gene therapy R&D and manufacturing, medical device testing, and molecular testing and genomics." And where you may ask, are they located? Wuxi Pharm was begun in Shanghai by Dr. Gi Li now with facilities also in Wuxi City, and Suzhou, China, as well as facilities in St. Paul, MN; Philadelphia, PA; and Atlanta, GA. Wuxi Pharmaceuticals is owned by none other than America's own – George Soros.

However, the web becomes more entangled as a reported owner of Gilead Bioscience is also - George Soros.

Holding this web together is that Gilead has endorsed and is engaged with a drug purchasing group, UNITAID.

UNITAID is an outgrowth of the United Nations, Millennium Declaration of 2000, which is now the UN Global Compact. The large investors in UNITAID include WHO, George Soros, Bill and Melinda Gates Foundation, and a partnership relationship with the Clinton Health Access Initiative. Both Dr.'s Fauci and Birx are associated with the Clinton Health Access Initiative.

When you may ask, will Remdesivir go into production? On February 12, 2020 – that is correct, February 12th - ten days after Trump initiated the China Travel Ban, [Bloomberg reported](#):

“A Chinese drugmaker said it has started mass-producing an experimental drug from Gilead Sciences that has the potential to fight the novel coronavirus, as China accelerates its effort to find a treatment for the widening outbreak.

Suzhou [China]-based BrightGene Bio-Medical Technology said in a statement filed to the Shanghai Stock Exchange on Tuesday night that it has developed the technology to synthesize the active pharmaceutical ingredients of remdesivir, Gilead’s drug that is a leading candidate to treat the highly-infectious virus that’s killed more than 1,000 people. The drug isn’t licensed or approved anywhere in the world yet. ...”

[Of interest, HHS has already won a lawsuit against Gilead](#), stating, "For nearly a decade, Gilead's price gouging on PrEP has prevented hundreds of thousands of Americans from accessing this technology, despite it being a taxpayer-funded invention," stated in a statement by the PrEP4All Collaboration. "If HHS is truly invested in ending the HIV epidemic, it will use these patents as leverage to ensure that everyone who needs PrEP can get it."

Can there be any uncertainty as to why Dr. Fauci, who worked closely with Gilead, is strongly eulogizing their more expensive and less effective medication, which has already failed against Ebola, over a readily available, markedly affordable medication with a 91% success rate?

Has America reached the point where, what once was unthinkable, became the unspeakable, and is now becoming the undeniable?

Consider the anti-liberty players: Anthony Fauci; George Soros; WHO & Tedros Adhanom Ghebreyesus; Xi Jinping and the Chinese Communist party; The Clinton Foundation; the FDA, which has tried to limit Hydroxychloroquine to hospital use where the window of maximum effect has passed, and now approves the unproven and expensive Remdesivir; CDC; who requires fraudulent death certificates to bolster the death rate, and dispensed Test kits tainted with SARS-CoV2; Bill and Melinda Gates; the Media; the Democrat Party and Representatives; countless numbers of influential's flying under the radar.

Is there any reason to believe anything these Domestic enemies say or offer?

Is there any reason America, the last great hope for humanity, should fall to a virus with a 99.6% survival rate, even if it's being manipulated by a well-orchestrated and executed malevolent plan by those with nefarious intentions? America will only fall if Americans continue to nurture their fear and refuse to stand against this stealthy malignancy eating away at the very core of freedom and liberty.

If Americans stand NOW and proclaim to the world, America is open for business, America is back. Then as President Lincoln proclaimed in his Annual Address to the U.S. Congress, 1 December 1862, "The way is plain, peaceful, generous, just -- a way which, if followed, the world will forever applaud, and God must forever bless."

"Those who expect to reap the blessings of freedom must, like men, undergo the fatigue of supporting it." - Thomas Paine
