

Veterans in Defense of Liberty

NEWS FROM THE FRONT

28 September 2020

Dear fellow Warriors,

Great news for Liberty, bad news for Tyranny. America is on the verge of roaring back and soon will have a developing Originalist Supreme Court!

Immediately below is the letter Veterans in Defense of Liberty® sent to the U. S. Senate Leadership calling for an immediate Floor Vote confirming Judge Amy Coney Barrett. - NOW!

We regret that the Senate will allow the egregious attacks on Judge Barrett and her family by permitting their exposure for an extended time-span and not moving to a Floor Vote - NOW.

Following the letter is President Trumps Executive Order "Protecting Vulnerable New Born and Infant Children."

Even amid the exercise of blatant evil, America can still move in the right direction, but still, the time for "Snow-globe activism is over. We all must stand now and always - tall for America.

See in, *The White House* [here](#)

28 September 2020

Dear Senators,

Veterans in Defense of Liberty's® Board of Directors has unanimously and forcefully agreed that we call upon the Senate to move with haste directly to a floor vote on Judge Amy Coney Barrett's Supreme Court confirmation. We must fight as they would – but within the law, and in this case, avoid a repeat Clown Show of immense proportion.

Having already been subjected to Confirmation Hearings, even going to the Judiciary Committee only provides more time for them to fight on the invisible Battlefield of ideas - A Battlefield of their choosing.

Let us finally show some spine and take the offense, thereby preventing the evil mayhem that will occur across our nation if her confirmation is protracted. As stated by Rush Limbaugh –“skip the despicable slander witch trials of personal destruction fake hearings in the Senate and just go to a floor vote NOW.” If we are to save America and the future of humanity from the sordid abyss of tyranny, we must switch from only playing defense to 100% offense.

As Ronald Reagan declared, “When you can't make them see the light, make them feel the heat.”

No good thing can come from any delay!

Moving with alacrity will fire up America's Constitutional base; not doing so will fire up theirs.

Very Respectfully,

Dr. Wm. Scott Magill

Executive Director

Executive Orders

Executive Order on Protecting Vulnerable Newborn and Infant Children

Issued on: September 25, 2020

By the authority vested in me as President by the Constitution and the laws of the United States of America, it is hereby ordered as follows:

Section 1. Purpose. Every infant born alive, no matter the circumstances of his or her birth, has the same dignity and the same rights as every other individual and is entitled to the same protections under Federal law. Such laws include the Emergency Medical Treatment and Labor Act (EMTALA), 42 U.S.C. 1395dd, which guarantees, in hospitals that have an emergency department, each individual's right to an appropriate medical screening examination and to either stabilizing treatment or an appropriate transfer. They also include section 504 of the Rehabilitation Act (Rehab Act), 29 U.S.C. 794, which prohibits discrimination against individuals with disabilities by programs and activities receiving Federal funding. In addition, the Born-Alive Infants Protection Act, 1 U.S.C. 8, makes clear that all infants born alive are individuals for purposes of these and other Federal laws and are therefore afforded the same legal protections as any other person. Together, these laws help protect infants born alive from discrimination in the provision of medical treatment, including infants who require emergency medical treatment, who are premature, or who are born with disabilities. Such infants are entitled to meaningful and non-discriminatory access to medical examination and services, with the consent of a parent or guardian, when they present at hospitals receiving Federal funds.

Despite these laws, some hospitals refuse the required medical screening examination and stabilizing treatment or otherwise do not provide potentially lifesaving medical treatment to extremely premature or disabled infants, even when parents plead for such treatment. Hospitals might refuse to provide treatment to extremely premature infants — born alive before 24 weeks of gestation — because they believe these infants may not survive, may have to live with long-term disabilities, or may have a quality-of-life deemed to be inadequate. Active treatment of extremely premature infants has, however, been shown to improve their survival rates. And the denial of such treatment, or discouragement of parents from seeking such treatment for their children, devalues the lives of these children and may violate Federal law.

Sec. 2. Policy. It is the policy of the United States to recognize the human dignity and inherent worth of every newborn or other infant child, regardless of prematurity or disability, and to ensure for each child due protection under the law.

Sec. 3.

(a) The Secretary of Health and Human Services (Secretary) shall ensure that individuals responsible for all programs and activities under his jurisdiction that receive Federal funding are aware of their obligations toward infants, including premature infants or infants with

disabilities, who have an emergency medical condition in need of stabilizing treatment, under EMTALA and section 504 of the Rehab Act, as interpreted consistent with the Born-Alive Infants Protection Act. In particular, the Secretary shall ensure that individuals responsible for such programs and activities are aware that they are not excused from complying with these obligations, including the obligation to provide an appropriate medical screening examination and stabilizing treatment or transfer, when extremely premature infants are born alive or infants are born with disabilities. The Secretary shall also ensure that individuals responsible for such programs and activities are aware that they may not unlawfully discourage parents from seeking medical treatment for their infant child solely because of their infant child's disability. The Secretary shall further ensure that individuals responsible for such programs and activities are aware of their obligations to provide stabilizing treatment that will allow the infant patients to be transferred to a more suitable facility if appropriate treatment is not possible at the initial location.

(b) The Secretary shall, as appropriate and consistent with applicable law, ensure that Federal funding disbursed by the Department of Health and Human Services is expended in full compliance with EMTALA and section 504 of the Rehab Act, as interpreted consistent with the Born-Alive Infants Protection Act, as reflected in the policy set forth in section 2 of this order.

(i) The Secretary shall, as appropriate and to the fullest extent permitted by law, investigate complaints of violations of applicable Federal laws with respect to infants born alive, including infants who have an emergency medical condition in need of stabilizing treatment or infants with disabilities whose parents seek medical treatment for their infants. The Secretary shall also clarify, in an easily understandable format, the process by which parents and hospital staff may submit such complaints for investigation under applicable Federal laws.

(ii) The Secretary shall take all appropriate enforcement action against individuals and organizations found through investigation to have violated applicable Federal laws, up to and including terminating Federal funding for non-compliant programs and activities.

(c) The Secretary shall, as appropriate and consistent with applicable law, prioritize the allocation of Department of Health and Human Services discretionary grant funding and National Institutes of Health research dollars for programs and activities conducting research to develop treatments that may improve survival — especially survival without impairment — of infants born alive, including premature infants or infants with disabilities, who have an emergency medical condition in need of stabilizing treatment.

(d) The Secretary shall, as appropriate and consistent with applicable

law, prioritize the allocation of Department of Health and Human Services discretionary grant funding to programs and activities, including hospitals, that provide training to medical personnel regarding the provision of life-saving medical treatment to all infants born alive, including premature infants or infants with disabilities, who have an emergency medical condition in need of stabilizing treatment.

(e) The Secretary shall, as necessary and consistent with applicable law, issue such regulations or guidance as may be necessary to implement this order.

Sec. 4. General Provisions. (a) Nothing in this order shall be construed to impair or otherwise affect:

(i) the authority granted by law to an executive department or agency, or the head thereof; or

(ii) the functions of the Director of the Office of Management and Budget relating to budgetary, administrative, or legislative proposals.

(b) This order shall be implemented consistent with applicable law and subject to the availability of appropriations.

(c) This order is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.
